

## **Annex C**

### **New Features on Resource Portal**

<b>Features</b>	<b>Details</b>
National Events Calendar	<p>This new calendar provides a comprehensive, real-time overview of upcoming sustainability events across Singapore (e.g. trade fairs, conferences, and training sessions).</p> <p>Organisers can list their events to connect with a wider audience, while attendees can conveniently discover opportunities to participate in.</p>
Community Forum	<p>Sustainability remains a relatively nascent topic for many enterprises. This new dynamic community forum encourages peer-to-peer sharing to enhance understanding of the evolving sustainability landscape and exchange best practices.</p> <p>Through shared experiences and open discussions, businesses can better appreciate the nuances of sustainability requirements, reporting obligations, and emissions calculations—accelerating learning and building collective confidence in navigating this complex space.</p> <p>This collaborative space will facilitate discussion on emerging topics such as International Sustainability Standards Board (ISSB) disclosure, sustainable supply chain management, and climate action strategies.</p> <p>The forum seeks to build a vibrant community that supports one another as they tackle new challenges in the sustainability landscape.</p>
Expanded Directory of Solution Providers	<p>Since Resource Portal was launched in October 2024, businesses can access a directory of carbon accounting software and sustainability reporting software solution providers.</p> <p>Businesses can now access an expanded directory of solution providers including sustainability consultancy, sustainability communications, employee engagement activities, and environmental labels. Each listing provides detailed information about the provider's capabilities and credentials, helping companies assess and select the most suitable partners for their sustainability initiatives.</p> <p>By fostering transparency and informed decision-making, these listings enable businesses to match their needs with best-in-class solutions. Businesses can expect more listings, including sustainability legal services, sustainability assurance, and energy efficiency hardware solution providers by early 2026.</p>
