

Partner Profiles

	Name of Company	Company Profile
1	BIPO	BIPO is a global provider of HR and payroll solutions that helps companies manage their workforce across multiple countries. The company offers cloud-based HR software, payroll outsourcing, and Employer of Record (EOR) services that automate HR processes and ensure compliance with local employment regulations. Its solutions enable businesses to manage the full employee lifecycle, from onboarding and payroll to performance management and offboarding, across international teams.
2	e2i	Employment and Employability Institute (e2i) is a workforce development organisation in Singapore that helps individuals improve their employability and connect with job opportunities. It works with workers, employers, unions, and government agencies to provide job matching, career coaching, and skills upgrading programmes. Through training initiatives, career services, and industry partnerships, e2i supports workforce development and helps businesses address manpower and productivity needs.
3	PwC Singapore	PwC Singapore is part of the global PricewaterhouseCoopers network, a professional services firm that provides assurance, advisory, consulting, and tax services to organisations across industries. The firm works with businesses, government agencies, and non-profit organisations to support strategic transformation, digitalisation, regulatory compliance, and operational improvement. PwC combines industry expertise with data, technology, and consulting capabilities to help organisations address complex business challenges and achieve sustainable growth.
4	Qiscus	Qiscus is a technology company that provides an AI-powered customer communication and engagement platform for businesses. Its software allows companies to manage customer conversations across multiple channels such as WhatsApp, live chat, social media, and websites in one system. The platform helps organisations automate customer support, manage sales enquiries, and improve customer experience through chatbots, messaging tools, and analytics.

5	Sekuro	Sekuro Operations is a cybersecurity consultancy that helps organisations protect their digital systems and data. The company provides services such as cybersecurity advisory, risk and compliance management, cloud security engineering, and managed security services. It works with businesses and government agencies to assess cyber risks, strengthen security controls, and ensure compliance with international standards while supporting secure digital transformation.
6	SG Enable	SG Enable is a Singapore government-supported social service organisation that promotes disability inclusion and supports persons with disabilities. It works with individuals, caregivers, employers, and community partners to improve access to employment, training, support services, and assistive technology. Through partnerships, grants, and programmes, SG Enable helps persons with disabilities live, learn, work, and participate more fully in society.
7	Singapore Institute of Directors (SID)	The Singapore Institute of Directors (SID) is the national association of company directors in Singapore, dedicated to promoting high standards of corporate governance and strengthening board leadership. SID supports directors and senior executives through professional development programmes, director accreditation, thought leadership, and networking opportunities. The institute works closely with regulators, listed companies, and industry partners to enhance board effectiveness and advance best practices in corporate governance across organisations in Singapore.
8	TalentKraft	TalentKraft is a Singapore-based human capital and learning solutions provider that supports organisations in developing workforce capabilities and improving employee performance. The company works with businesses, industry associations, and training providers to design and deliver professional development programmes, leadership training, and skills upgrading initiatives. Through its expertise in talent development and organisational learning, TalentKraft helps organisations strengthen their workforce and build sustainable talent pipelines.
9	Wizlearn Technologies	Wizlearn Technologies is a Singapore-based education technology company that provides digital learning and training solutions to schools, corporations, and government agencies. Its core product is a Learning Management System (LMS) that enables organisations to deliver online training, manage courses, track learner progress, and conduct assessments. The company also offers e-learning consultancy, customised course content development, and system integration services to support digital training and education initiatives.
